PRESENTING OUR ENVIRO RANGE

ENVIRONMENTALLY-FRIENDLY PACKAGING
SOLUTIONS FROM MULTI-CUP SOLUTIONS

As a well-established disposable food and beverage packaging supplier in the South African market we have extended our range of products with a selection of enviro-friendly packaging

PLANT(PLA) STARCH

At Multi-cup Solutions we offer clear PLA cups with dome and flat lids in three sizes. Polylactic acid (PLA) is a biodegradable polymer derived from lactic acid made from renewable plant products like corn, wheat and other starch rich plants. The clear cups have excellent clarity and are flavour and odour resistant.

Paper cups are lined with a thin layer of PLA to prevent the cup from leaking. The sip lids for the paper cups are made from CPLA where chalk and other biodegradable substances have been added to the PLA to increase heat resistance.

SUGAR CANE (BAGASSE) PRODUCTS

Meal boxes, food trays and plates in various sizes are made from a waste byproduct of sugar cane called bagasse.

These products are strong, maintain their shape and present well. The products are oil and heat resistant. Furthermore the products are microwave and freezer safe and are suitable for reheating food.

Central Food Solutions (Pty) Ltd

ENVIRO RANGE

-  COMPOSTABLE / BIODEGRADABLE / RECYCLABLE
-  RENEWABLE PLANT-BASED RESOURCES
-  ENVIRONMENTALLY-FRIENDLY
-  REDUCES WASTE TO LANDFILLS
-  REDUCES CARBON FOOTPRINT

PAPER PRODUCTS

It is very important that the raw material used for the paper products come from certified sustainable and well-managed forests(FSC). A wide variety of products are available in recycled paper, for example paper bags and cup carriers. At Multi-cup Solutions we offer various kraft paper containers made from food grade approved material which can be used for hot and cold food. We have a range of white and black wrapped paper straws in three different sizes. Straws in other colours are available on request. Paper straws are marine friendly.

WOODEN PRODUCTS

The wooden products are made from renewable and sustainable plant-based resources and are therefore fully compostable. At Multi-cup Solutions we offer a selection of disposable skewers, stirrers, chopsticks and wooden cutlery.

The wooden cutlery is durable and presentable. All these wooden products are suitable for hot and cold food.
