## 1001 full curl

	Capacity	40ml
	Top out	78
	Base	47
	Height	13
	Lid	n/a

## 1010 raw edge

	Capacity	55ml
	Top out	83
	Base	44
	Height	20
	Lid	n/a

## 1020 raw edge

	Capacity	100ml
	Top out	113 x 78
	Base	70 x 40
	Height	20
	Lid	n/a

## 1021 full curl

	Capacity	75ml
	Top out	121 x 89
	Base	68 x 42
	Height	16
	Lid	n/a

## 1030 raw edge

	Capacity	55ml
	Top out	90
	Base	55
	Height	15
	Lid	n/a

## 1051 full curl

	Capacity	140ml
	Top out	135 x 100
	Base	72 x 47
	Height	25
	Lid	n/a

## 1081 full curl

	Capacity	40ml
	Top out	67
	Base	40
	Height	19
	Lid	n/a

## 1091 full curl

	Capacity	110ml
	Top out	132 x 99
	Base	81 x 55
	Height	20
	Lid	n/a

## 1201 full curl

	Capacity	25ml
	Top out	57
	Base	35
	Height	20
	Lid	n/a

This colour wheel tells you that whatever container it is next to, the container is readily available in various colours and print styles for quick and easy flavour or brand identification.

## 2001 full curl

	Capacity	100ml
	Top out	105
	Base	64
	Height	20
	Lid	n/a

## 2011 full curl

	Capacity	200ml
	Top out	125
	Base	75
	Height	28
	Lid	n/a

## 2031 full curl

	Capacity	410ml
	Top out	187
	Base	161
	Height	21
	Lid	n/a

*This is a fantastic quiche container!*

## 2041 full curl

	Capacity	150ml
	Top out	105
	Base	72
	Height	30
	Lid	n/a

## 2051 full curl

	Capacity	480ml
	Top out	164
	Base	146
	Height	27
	Lid	205PD: Combo

## 2061 full curl

	Capacity	365ml
	Top out	194
	Base	144
	Height	20
	Lid	n/a

## 2071 full curl

	Capacity	100ml
	Top out	109
	Base	59
	Height	20
	Lid	n/a

## 2081 full curl

	Capacity	130ml
	Top out	122
	Base	100
	Height	14
	Lid	n/a

## 2091 full curl

	Capacity	280ml
	Top out	125
	Base	90
	Height	35
	Lid	n/a

## 2101 full curl

	Capacity	100ml
	Top out	112
	Base	65
	Height	21
	Lid	n/a

## 2111 full curl

	Capacity	65ml
	Top out	72
	Base	50
	Height	27
	Lid	n/a

## 2131 full curl

	Capacity	100ml
	Top out	105
	Base	64
	Height	20
	Lid	n/a

## 2151 full curl

	Capacity	135ml
	Top out	80
	Base	56
	Height	44
	Lid	n/a

## 2161 full curl

	Capacity	70ml
	Top out	71
	Base	50
	Height	30
	Lid	n/a

2152 raw vertical edge  
Lid - B2152: polyboard

## 2171 full curl

	Capacity	150ml
	Top out	94
	Base	70
	Height	32
	Lid	n/a

## 2181 full curl

	Capacity	150ml
	Top out	123
	Base	83
	Height	21
	Lid	n/a

## 2191 full curl

	Capacity	170ml
	Top out	88
	Base	67
	Height	38
	Lid	PL219

## 2201 full curl

	Capacity	50ml
	Top out	60
	Base	36
	Height	27
	Lid	B2201

## 2211 full curl

	Capacity	150ml
	Top out	116
	Base	66
	Height	25
	Lid	n/a

## 3001 full curl

	Capacity	400ml
	Top out	204
	Base	147
	Height	20
	Lid	n/a

*TIP: 2211 Has a good pastry to filling ratio. It's slightly larger than 2001.*

## 3002 hemmed

	Capacity	550ml
	Top out	221
	Base	146
	Height	25
	Lid	P3002L

## 3011 full curl

	Capacity	800ml
	Top out	228
	Base	165
	Height	27
	Lid	n/a

*We have a hand-closing machine available for this container.*

## 3021 full curl

	Capacity	n/a
	Top out	160
	Base	n/a
	Height	22
	Lid	n/a

## 3031 full curl

	Capacity	n/a
	Top out	205
	Base	n/a
	Height	22
	Lid	n/a

## 3051 full curl

	Capacity	1000ml
	Top out	232
	Base	198
	Height	36
	Lid	n/a

## 3061 full curl

	Capacity	2000ml
	Top out	275
	Base	250
	Height	36
	Lid	n/a

**3052** raw vertical edge  
Lid - B3052: polyboard

### 3071 full curl

	Capacity	600ml
	Top out	193
	Base	170
	Height	24
	Lid	PL307: plastic

### 3071F full curl

# Microwave Safe

Conclusive evidence that aluminium foil packaging can be used safely in modern microwave ovens has been established by a study from the Fraunhofer Institute for Process Engineering and Packaging IVW in Freising, Germany.

The results dispel the myth that aluminium foil containers are unsafe for use in microwave ovens and prove that consumer fears about using aluminium containers in the microwave are unfounded.

In fact, aluminium foil containers are an ideal packaging for convenience meals as they retain their shape and rigidity across all methods of heating. In some instances the appearance, flavour and texture of food that has been heated in a microwave oven can be greatly enhanced when placed under the grill, giving it an authentic oven-baked appearance.

The study also provided some interesting results regarding heating patterns and heating uniformity. In some cases they appeared to be better in aluminium foil trays.

Information supplied by [www.alufoil.org](http://www.alufoil.org)

Follow these basic guidelines for using aluminium foil containers in the microwave oven with confidence:

**Step 1:** The aluminium lid/film must be removed from the tray before use.

**Step 2:** The aluminium foil container should be at least two thirds full.

**Step 3:** Place the container on an ovenable plate, in the centre of the microwave oven.

**Step 4:** Make sure the edges of the aluminium foil container are at least 2cm away from the sides of the microwave oven walls.

**Step 5:** Place only one aluminium foil container in the microwave oven at a time.

Heat distribution when heating in a microwave oven is far more even as microwaves enter from the top and the heating pattern is from the top down, resulting in more uniform cooking.

*Pies that look this good, should have your name on it.*

## Printing

**Differentiation is key to growth in the modern market. Brands have become our most important assets and we need to leverage every appropriate opportunity to 'sell' that brand.**

Our in-house design team combined with our tool and mould making facilities provides endless opportunities for branding and product identification; by various methods including printing, embossing and unique shape design.

Wherever there is direct food contact, water based inks are used to ensure a safe and environmentally friendly printing process.

Many of our pie cases are already available in different colours and if you are in the convenience meal or airline industry, be sure to ask about our photographic print quality on our aluminium lids!

Appearance matters a great deal. You can often tell a lot about people by looking at how they present themselves.

... Products are no different.

# Lids

## You know what's going inside, now what do you put on top?

The type of lid depends on the rim style of the container and the rim style depends on the specific requirement of the container. Vertical flange, hemmed edge, full curl vertical and interrupted vertical rim styles can accommodate rigid lids although in some cases snap-on lids can be provided for full curl containers. Below are some illustrations for each of our rim styles.

### Raw Vertical Flange (rvf)

Crimped down over the lid, the raw vertical flange provides a fairly tight closure. The support offered by the lid also gives increased strength to the pack. Lids in foil, polyboard and rigid transparent plastic are included among the many types of lids available.

### Full Curl

The product gains additional protection from this rim style which gives maximum strength and rigidity to the container. Ideally suited for high-speed dispensing machines used on large production lines. The evenly rounded edge also makes the container more attractive as a serving dish. Film or foil over-wraps, flat foil hoods or snap-on plastic lids can be used to close these containers.

### Interrupted Vertical Curl (ivc)

Available only on rectangular and square containers, the combination of a raised curled flange on the sides and a raw vertical flange on the corners offers maximum strength and tight closure, using either board or transparent lids.

### Slightly Raised Full Curl

Similar to the full curl but slightly raised to further prevent spillage.

### Heat Seal Curl

Exclusive to smoothwall containers, the full curl is located at a minimum of 2/3 below the flat ledge. It's primary use is to provide a flat unrestricted surface to which a heat sealed film is applied.

### Hemmed Edge

Similar to the raw vertical flange where the metal is folded back on itself, presenting a blunt edge.

### Lid Type

Depending on the rim style, there are various lid options to choose from: polyboard, plastic, foil and heat-seal film.
